

Megalithic Quarrying: Sourcing, Extracting and Manipulating the Stones, , ISSN 0143-3067, . Archaeopress, 2009. 2009. 9781407304052. 92 pages. International Union of Prehistoric and Protohistoric Sciences

Most of the megalithic culture are made by stone blocks, available in nature. A few of them are slightly shaped; others are rude. The types have been distinguished on the basis of the number of stone blocks and their position of placement. In late Neolithic period, the custom of erecting gigantic monuments became popular in North and Western Europe. As the name indicates, megalith is a great structure built on large-size stone. (Greek words megas means great and lithos means stone). They served the funerary or cult purpose. Neolithic farmers paid special attentions in making the burials in con Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the article number or pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct. Formatting requirements. There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Abstr The quarries and processing plants are littered with large amounts of waste products deriving from extraction, sawing, polishing. At present, no significant activities are in place to recover and reuse the ultrafine CaCO₃ dust combined in waste slurries of marble processing plants. It can be helpful to considering these calcareous particles as primary or secondary raw materials for use in other production.Â The term marble is also applied to Serpentine rocks that can be polished to high shine. These are the natural stones which can be shaped in form of blocks, slabs, tiles, etc. and are used for monumental and decorative purposes since antiquity; various civilizations have used dimension stone in many ancient building and monuments that have survived to the present day.
