

Proceedings of the Royal Society of London, Volume 61. 1897. Royal Society (Great Britain). Taylor & Francis, 1897

Human societies, and their well-being, depend to a significant extent on the state of the ecosystems that surround them. These ecosystems are changing rapidly usually in response to anthropogenic changes in the environment. To determine the likely impact of environmental change on ecosystems and the best ways to manage them, it would be desirable to be able to predict their future states. We present a proposal to develop the paradigm of predictive systems ecology, explicitly to understand and predict the properties and behaviour of ecological systems. We discuss the necessary and desirable features. Log in/Register. Proceedings of Vol. 61, 1897. Proceedings of the Royal Society of London. Vol. 61, 1897. On the Orientation of Greek Temples and the Dates of Their Foundation Derived from Astronomical Considerations, Being a Supplement to a Paper Published in the 'Transactions of the Royal Society,' in 1893. [Abstract]. On the Orientation of Greek Temples and the Dates of Their Foundation Derived from Astronomical Considerations, Being a Supplement to a Paper Published in the 'Transactions of the Royal Society,' in 1893. [Abstract] (pp. 76-78). F. C. Penrose. Proceedings of the Royal Society is the parent title of two scientific journals published by the Royal Society. Originally a single journal, it was split into two separate journals in 1905: Part A: which publishes research related to mathematical, physical, and engineering sciences (including computer science). Part B: which publishes research related to biology. The Royal Society is collaborating with JSTOR to digitize, preserve and extend access to Proceedings of the Royal Society of London. Series A, Mathematical and Physical Sciences. <http://www.jstor.org>

The elastic field outside an ellipsoidal inclusion or inhomogeneity may be expressed entirely in terms of the harmonic potential of a solid ellipsoid. The solution gives incidentally the velocity field about an ellipsoid which is deforming homogeneously in a viscous fluid. An expression given previously for the strain energy of an ellipsoidal region which has undergone a shear transformation is generalized to the case where the region has elastic constants different from those of its surroundings. The Online Books Page. presents serial archive listings for. Proceedings of the Royal Society of London. Proceedings of the Royal Society of London is a journal of the Royal Society with refereed scientific research papers. Publication History.

1832-1939: Gallica has page images for most of the first 170 volumes in PDF form. The interface is partly in French, and ergonomically leaves much to be desired, but if you have a relatively current Web browser, with a PDF plugin, and scripting on, it should be browseable. Official Site / Current Material. The official Royal Society Publications Web site includes tables of contents and other information on the current Proceedings and other publications.
