

Why Do Bees Buzz?: Fascinating Answers to Questions about Bees; 9780813549200; Rutgers University Press, 2010; Elizabeth Evans, Carol A Butler; 2010; 248 pages

Fascinating Answers to Questions about Bees (2010). Why Do Bees Buzz? reports on the mysterious "colony collapse disorder" that has affected honey bee populations, as well as other captivating topics, such as their complex, highly social lives, and how other species of bees are unique and different from honey bees. Organized in chapters that cover everything from these provocative pollinators' basic biology to the aggressive nature of killer bees, this insightful question and answer guide provides a honeycomb of compelling facts. With clarity and depth, bee biologist Elizabeth Capaldi Evans and coauthor Carol A. Butler examine th (9780813547213): Fascinating Answers to Questions About Bees: NHBS - Elizabeth Capaldi Evans and Carol A Butler, Rutgers University Press. Why do bees buzz? How do they breathe? What is a 'waggle dance'? And just what happens if they run out of honey? Twenty-five thousand species of bees certainly create a loud buzz. Yet silence descended a few years ago when domesticated bee populations plummeted. Bees, in particular honey bees, are critical links in the vibrant chain that brings fruits, vegetables, and nuts to markets and dinner tables across the country. Farmers and scientists on the agricultural frontlines quickly realized the impact of this loss, but many others did not see this devastation. When aging bees do jobs usually reserved for younger members, their brain stops aging. In fact, their brain ages in reverse. (Imagine if riding a tricycle didn't just make you feel young—it actually made your brain tick like a younger person's.) Scientists at Arizona State University believe the discovery can help us slow the onset of dementia. 5. Bees are changing medicine. To reinforce their hives, bees use a resin from poplar and evergreen trees called propolis. It's basically beehive glue. Although bees use it as caulk, humans use it to fight off bacteria, viruses, and fungi Fascinating answers to questions about bees | Twenty-five thousand species of bees certainly create a loud buzz. Yet silence descended a few years ago when domesticated bee populations | Find, read and cite all the research you need on ResearchGate.
