

Journal of Ethnobiology
INDEX TO KEY WORDS
Volume 6, Number 1 through Volume 15, Number 2

JENNIFER SEPEZ
Department of Anthropology
University of Washington
Seattle, WA 98119

An index to Volumes 1 through 5 appeared in Volume 5, Number 2. Following that format, all entries indicate the entire article rather than specific pages within an article. The volume number appears in bold, followed by the page numbers. The year the volume was published can be calculated by adding 1980 to the volume number, thus volume 6 was published in 1986. Copies of this index are available at a cost of \$5.00 from the Secretary/Treasurer of the Society of Ethnobiology (see inside front cover of most recent issue). Make checks payable to *Journal of Ethnobiology*. In some cases, back issues of the *Journal of Ethnobiology* may be available (see subscription information on the inside back cover).

A

Acrocomia mexicana, 10:183-194.

Adams, Karen R., Prehistoric reedgrass (phragmites) "cigarettes" with tobacco (*nicotiana*) contents: a case study from Red Bow Cliff dwelling, Arizona, 10:123-139.

Adaptation (to resource variance), 15:119-148.

Africa, 14:173-183; 15:257-280.

Agricultural systems, 6:151-167; 14:43-57; 6:169-204.

Agriculture, 12:161-185; 6:279-288.

Amazon, 6:229-238; 8:141-148.

Anasazi, 7:137-155.

Ancibor, Elena and Cecilia Pérez de Micou, Identification of firewood species in the archaeological record of the Patagonian steppe, 15:189-200.

Anderson, M. Kat, California Indian horticulture: management and use of red-bud by the Southern Sierra Miwok, 11:145-157.

Andes, 11:23-49; 12:161-185; 6:169-204.

Antelope, 10:169-181.

Arizona, 10:123-139.

Arkush, Brooke S., Aboriginal exploitation of pronghorn in the Great Basin, 6:239-255.

Arrowroot, 14:211-234.

B

Balzapote, 8:45-79.

Baobob tree, 14:173-183.

Bauer, Aaron M. and Anthony P. Russell, *Hoplocactylus delcourti* (reptilia:

- Gekkonidae) and the *kawekaweau* of Maori folklore, 7:83-91.
- Begossi, A., H. F. Leitiao-Filho and P.J. Richerson, Plant uses in a Brazilian coastal community (Buzios Island), 13:233-256.
- Begossi, Alpina, Food taboos and Buzios Island (Brazil): their significance and relation to folk medicine, 12:117-139.
- Benz, Bruce F., Francisco Santana M., Rosario Pineda I., Judith Cevallos E., Luis Robles H. and Domitila de Niz I., Characterization of Mestizo plant use in the Sierra de Manantlan, Jalisco-Colima, Mexico, 14:23-41.
- Berries, 9:69-110; 15:89-98.
- Big horn sheep, 10:169-181.
- Biodiversity, 6:151-167; 11:23-49; 12:161-185; 13:203-232; 14:43-57; 15:71-88; 15:119-148.
- Birds, 10:43-57; 12:83-115; 14:59-73.
- Body weight (estimations from remains), 7:1-12.

As the term implies, keyword search volume refers to the volume (or number) of searches for a particular keyword in a given timeframe. Keyword search volume is typically averaged over a set timeframe to provide marketers with a general idea of a search term's competitiveness and overall volume. This data is often contextualized within specific timeframes to allow SEOs and marketers to see how certain keywords drive traffic over time. Keyword Tool is #1 (FREE) alternative to Google Ads Keyword Planner for SEO & PPC keyword research - Generate 1,000s of long-tail keywords in seconds! The first place to start is with long-tail research and this can be done with the help of a number of tools. My first choice, however, is always KeywordTool.io. How Does Keyword Tool Work? Keyword Tool is free online keyword research instrument that uses Google Autocomplete to generate hundreds of relevant long-tail keywords for any topic. Each key on any keyboard has a unique Direct Input Keyboard (DIK) code. They are not character symbols. They refer to the position of the key on the keyboard. In other words, depending on the keyboard layout, the actual key can change, but its position is always identical. This is useful to fulfill ergonomic needs. In addition to that, using DIK codes has more advantages: Recognize keys that can not be represented in character equivalents. Function keys for example have no character set code. Using the defines below, makes using key codes easier in configs, since the actual code is replaced by You will extract all the numbers in the file and compute the sum of the numbers. Data Files We provide two files for this assignment. In this assignment you will read through and parse a file with text and numbers. You will extract all the numbers in the file and compute the sum of the numbers. Data Files We provide two files for this assignment.
