An international workshop on Elementary Excitations and Fluctuations in Magnetic Systems was held in San Miniato, Italy, for five days beginning 28 May, 1984. The workshop comprised eight working sessions that contained a total of 43 invited talks, and 58 scientists were in attendance from 14 countries. Our aim was to review some topics of current interest in the statistical physics of magnetic materials and models, with an emphasis on theoretical studies and confrontations between these and experimental and computer simulation data. book contains summary papers written by the invited speaker Magnetic excitations and fluctuations. proceedings of an international workshop, San Miniato, Italy, May 28-June 1, 1984. by S. W. Lovesey. 0 Ratings. Magnetic Excitations and Fluctuations S.W. Lovesey; U. Balucani; F. Borsa; V. Tognetti Springer 9783642823718 : An international workshop on Elementary Excitations and Fluctuations in Magnetic. The magnificent venue of the workshop, I Cappuccini, was made available to us by the Cassa di Risparmio San Miniato. Financial support for the workshop was received from Consiglio Nazionale delle Ricerche, Università degli Studi di Firenze and the Gruppo Nazionale Struttura, della Materia. Our administrative load and the burden of preparing the proceedings for publication was made light by the talents of Carla Pardini (CNR, Florence), and Caroline Monypenny and Jane Warren (Rutherford Appleton Laboratory).
