Going to the dentist. Dentists recommend that you go for a check-up at least twice a year. At the same time as you see the dentist, you can also make an appointment with the dental hygienist who will clean and polish your teeth for you. The dentist checks that your teeth are in good condition. If you have a hole, or a cavity, you may need a filling, which is a small amount of porcelain that the dentist uses to fill the hole. Some adults also experience problems with their wisdom teeth. There are four of these teeth: two top teeth, and two bottom teeth at the extreme left and right of the mouth. If they don't come down properly, they can become painful and need to be removed. If you fall over and knock out one of your front teeth, the dentist may be able to fit a false tooth.
