

WHALES & DOLPHINS QUES PB. Smithsonian, 2002. 2002. Mead Jg

"Dolphins sit there, and gulls, and cormorants, and otter, and whales too, but not clouds." "It is a whale, maybe." Ramo was standing on one foot and then the other, watching the ship coming, which he did not know was a ship because he had never seen one. I had never seen one either, but I knew how they looked because I had been told. Like a dolphin lying on its side, with its tail pointing toward the sunrise, its nose pointing to the sunset, and its fins making reefs and the rocky ledges along the shore. Whether someone did stand there on the low hills in the days when the earth was new and, because of its shape, called it the Island of the Blue Dolphins, I do not know. Many dolphins live in our seas and it may be from them that the name came. How many fingers do whales have? Why do whales strand on beaches? Do dolphins protect humans from sharks? What does DNA reveal about the ancestry of cetaceans? This comprehensive book is a collective response to thousands of letters and phone calls received annually by the Smithsonian's National Museum of Natural History. Students, teachers, and scientists all have amazing How many fingers do whales have? Why do whales strand on beaches? Do dolphins protect humans from sharks? What does DNA reveal about the ancestry of cetaceans? This comprehensive book is a collective response to thousan Whales, Dolphins and Porpoises by Mark Carwardine, 9780789489906, available at Book Depository with free delivery worldwide.
