

# Monuments and Landscape in Atlantic Europe: Perception and Society During the Neolithic and Early Bronze Age Psychology Press, 2002 2002 9780415273145

Christopher Scarre 210 pages

Recent papers in Late Neolithic settlement and ritual & Bronze Age monumentality. Papers. People. From this micro-region of only 814 km<sup>2</sup>, located in the central part of southern Jutland, 130 houses have been documented from the Late Neolithic and Early Bronze Age. As a result, there is a need for a comprehensive study of the developments that can be read through this house data. This article addresses settlement dynamics from the middle of the Late Neolithic to the late Early Bronze Age (c. 2000 – 1200 BC), for the period into which most of these houses fall. We see a correlation between the intensification of cultivation and greater settlement density during the course of the Late Neolith... The Significance of Monuments: On the Shaping of Human Experience in Neolithic and Bronze Age Europe is an archaeological book authored by the English academic Richard Bradley of the University of Reading. It was first published by Routledge in 1998. Adopting a chronological approach from the Mesolithic through the Neolithic and into the Early Bronze Age, Bradley discusses the various different types of monuments that were constructed in Europe during this period, from the passage tombs and causewayed Perception and Society during the Neolithic and Early Bronze Age. by Chris Scarre. 0 Ratings. "The Iberian peninsula at the south-western extremity of Europe is a large and diverse land mass connected to the remainder of the Continent by a relatively narrow neck of land that is itself obstructed by the Pyrenean mountain cham."
