This part of the Code of Practice relates to the prosecution of patent applications. The process of examination and amendment of patent applications ideally proceeds by eliminating objections until the application can be granted. To expedite the granting of an application, the substantive examiner will attempt to indicate all objections in the first report issued under s.18(3). The main exception to this This Code of Practice replaces the 2008 Code of Practice and comes into effect for the November 2017 examination series. It will continue to apply until further notice. The Code of Practice is subject to revision in line with Cambridge International's commitment to continual improvement. Any additions, deletions or amendments will be placed on our public website at [www.cambridgeinternational.org](http://www.cambridgeinternational.org).

Structure Each chapter of this Code of Practice comprises a set of aims and, for each aim, a set of commitments. The Code of Practice explains our responsibility to International Students while they study with us. We want you to be well-informed, safe, and properly cared for during your time here. Study with us. Education (Pastoral Care of International Students) Code of Practice 2019. New Zealand education providers play an important role to ensure that International Students are properly looked after, we call this pastoral care. A set of codes of practice is a code of conduct that regulates how an industry or business must conduct itself and they usually come into force as a result of some kind of enquiry into misconduct. For example, the broadcasting industry is regulated by mandatory codes that came out of concerns that date back to Orson Welles War of the World broadcast. Looking forward A code of practice can be a document that complements occupational health and safety laws and regulations to provide detailed practical guidance on how to comply with legal obligations, and should be followed unless another solution with the same or better health and safety standard is in place, or may be a document for the same purpose published by a self-regulating body to be followed by member organisations.
